## WELCOME TO THE SCIENCE CONFERENCE 2022!

This year, the ICOS Science Conference is organised in Utrecht, the Netherlands, and online 13-15 September 2022. The conference is fully hybrid, inviting participants from all across the world to join.

The conference provides exceptional opportunities to engage with the ICOS community and fellow scientists from all over the world. We are looking forward to facilitating interaction between all ICOS domains and beyond, as well as inspiring vivid discussions where new research ideas and topics can emerge.

With a record number of abstracts received, ICOS Science Conference will be bigger than ever this year. The keynote speakers are selected via our double anonymous abstract evaluation system and the first draft of the conference programme is announced on our website in mid June 2022.

We have a range of exciting, high-quality session proposals which have been grouped into seven themes under the overarching topic for the conference "Tracking progress to carbon neutrality". In addition, for the first time this year, we have proposed a manufacturers session. This session is for instrument manufacturers to share their latest case studies and technical solutions, and to debate future industry trends and current challenges.

## THEMES

**A. TERRESTRIAL  
ECOSYSTEMS**

**B. MARINE &  
AQUATIC  
CARBON  
CYCLING**

**C. FLUXES  
FROM LOCAL  
TO REGION-  
AL SCALES**

**D. POLICY  
RESEARCH  
INFRA-  
STRUCTURES  
AND SOCIETY**

**E. MONITORING,  
VALIDATION &  
VERIFICATION**

**F. TRACE  
GASES**

**G. EXTREME  
EVENTS**

**H. MANU-  
FACTURERS  
SESSION**

SCIENCE CONFERENCE  
**UTRECHT, NL & ONLINE**  
13-15 SEPTEMBER 2022

**The conference registration opens on Monday 16th of May 2022. There are two options for participation - in person and remotely.**

In both options attendees are able to listen and ask questions during the plenaries, parallel and poster sessions. Both types of attendees have equal opportunities to present their accepted research work explained in their abstracts either as Oral or Poster presentations, depending on the results of the Abstract Evaluation.

## PARTICIPATION FEES

### 370€ | In person at Tivoli Utrecht

- Full access to all the conference content on-site
- Icebreaker Event on Monday 12th of September 4-6pm in the RONDA Foyer
- Two coffee breaks and lunches included during the conference 13-15th of September

There will also be a conference dinner organised on Wednesday evening for interested on-site participants for a separate additional fee.

### 190€ | Carbon friendly remote participation

- Full access to all the conference content online
- Equal opportunities to follow all of the presentations
- Possibility to ask questions and participate in discussions remotely

## REGISTRATION

Participation in person and remotely requires online registration. We have a limited space for participants onsite, so please sign up as quickly as possible to secure your seat.

The registration link can be accessed on the ICOS Science Conference website: [icos-ri.eu/sc2022](https://icos-ri.eu/sc2022)

SCIENCE CONFERENCE  
**UTRECHT, NL & ONLINE**  
13-15 SEPTEMBER 2022

Image: TivoliVredenburg

## THE VENUE

Situated in the centre of the medieval city of Utrecht, TivoliVredenburg is a unique contemporary complex for various events. It is located next to the central train station downtown. Amsterdam and Schiphol Airport are just 30 minutes away by train, Rotterdam and The Hague only 45 minutes away. There are daily international trains from and to Brussels (2 hours), Cologne (2,5 hours) and Paris (3,5 hours).

For more info, go to [www.ns.nl](http://www.ns.nl) or [www.nshighspeed.nl](http://www.nshighspeed.nl) (international).

## PRESENTATIONS

All presentations will be uploaded to the to the conference platform regardless whether the presenter will be attending in person or remotely. The same online conference platform is used both on site in Utrecht and remotely to ask questions to the presenters.

Once the abstract evaluation is completed, the draft programme will be published on our conference website and there will be a mobile app, where all attendees can set up their own unique programme composed of their favourites.
